Lithuanian — EU Citizen

I am a software engineer with 4+ years of experience developing interactive applications with React, Angular, TypeScript, and modern web technologies. My focus is on frontend development, building responsive, accessible, and maintainable interfaces that turn complex requirements into intuitive user experiences.

CORE SKILLS

Frontend	React, JavaScript, Angular, TypeScript, Tailwind CSS
Backend	Python
UI engineering	Responsive web interfaces, Dashboards, Usability improvements
Delivery & tools	Git, Figma, Agile / sprint-based development

WORK EXPERIENCE

Senior Software Engineer - MAIT Austria GmbH, Linz, Austria 11/2024 – 10/2025

- Led technical workshops and product demonstrations for AR and IoT solutions, translating client requirements into working application.
- Worked with clients and various teams on proof-of-concept projects, refining solution ideas through hands-on testing and feedback.

Software Developer - IoT & AR - MAIT Austria GmbH, Linz, Austria 07/2023 – 11/2024

- Designed and implemented user interfaces and operational dashboards for an industrial IoT platform, making shopfloor and workflow data easier to understand and use.
- Evaluated IoT and AR technologies for client digitalisation initiatives and proof-of-concept development.

Software Engineer - NTS Retail KG, Linz, Austria 01/2022 – 02/2023

- Modernized existing Angular applications by upgrading the framework version and improving responsive behaviour across various platform.
- Contributed primarily to frontend development while supporting selected backend tasks.

Project Contributor - Johannes Kepler University, Linz, Austria 07/2021 – 12/2021

- Maintained and enhanced legacy React applications, with a focus on frontend performance and usability.
- Delivered frontend work within an Agile, sprint-based team and supported backend development where required.

Junior Frontend Developer - Softrobotics UAB, Vilnius, Lithuania 06/2020 – 09/2020

- Designed and developed custom WordPress websites based on client requirements, delivering user-friendly frontend solutions aligned with business needs.

EDUCATION

MSc. - Interactive Media - FH Oberösterreich, Campus Hagenberg 2020 – 2022

Thesis: "Interaction techniques for airborne light fields using web-based rendering"

BSc. - Multimedia Design - Vilnius Gediminas Technical University 2016 – 2020

Thesis: "Website about Lithuanian castles and forts (with map using Google Maps API)"
Erasmus Semester, FH Oberösterreich, Hagenberg (2019)

LANGUAGES & TRAINING

Languages Lithuanian (native), English (C1), German (A2 certified; B1.1 course completed)

German B1.1 WIFI Oberösterreich 03/2025–04/2025

German A2.2 / ÖIF A2 BFI Oberösterreich 05/2023–07/2023, ÖIF Integration Exam 09/2023
